DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 52, 53, 56-61, 103, 105, 107, and 109, drawn to a rare-earth magnet.

Group II, claim(s) 54, 55, 104, 106, 108, and 110, drawn to rare-earth magnet.

Group III, claim(s) 62-84 and 111-121, drawn to rare-earth magnet.

Group IV, claim(s) 85 and 87-90, drawn to a method of manufacturing a rare-earth magnet.

Group V, claim(s) 86 and 122-125, drawn to a method of manufacturing a rare-earth magnet.

Group VI, claim(s) 91-99 and 126-134, drawn to a method of manufacturing a rare-earth magnet.

Group VII, claim(s) 100-102 and 135, drawn to a method of manufacturing a rare-earth magnet.

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is the rare-earth magnet comprising a protective layer.

This element cannot be a special technical feature under PCT Rule 13.2 because the

Art Unit: 1794

element is shown in the prior art. JP 2005-285793, provided in the IDS, teaches such element (Abstract).

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species A: outer protective layer is an oxide layer

Species B: outer protective layer is a resin layer

Species C: outer protective layer is a metal salt layer

Species D: outer protective layer contains an organic-inorganic hybrid compound

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1794

4. The claims are deemed to correspond to the species listed above in the following manner:

Species A: Claims 68-73, 95, 112, 113, 127, and 128

Species B: Claims 74-76, 96, 97, 114, 115, 129, and 130

Species C: Claims 77-79, 98, 116, 117, 131, and 132

Species D: Claims 80-83, 99, 118-121, 133, and 134

The following claim(s) are generic: 52, 54, 62, 85, 86, 91, and 100.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is the an outer protective layer. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. JP 2005-285793, provided in the IDS, teaches an outer protective layer on a rare-earth magnet (Abstract and Fig. 2).

6. A telephone call was not made to request an oral election to the above restriction requirement due to the complexity of the restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Art Unit: 1794

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the

Art Unit: 1794

above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
